

Directus Extension Doppler

A directus extension for using Doppler

Install extension package

```
npm i directus-extension-doppler
```

Add extension to project

Find and copy folder "directus-extension-doppler" from "/node_modules" to "/extensions"

Set env for Doppler

File: .env

```
DOPPLER_PROJECT="DOPPLER PROJECT NAME"
DOPPLER_CONFIG="DOPPLER CONFIG"
DOPPLER_TOKEN="DOPPLER ACCESS TOKEN"
```

NAME	Required
DOPPLER_PROJECT	YES
DOPPLER_CONFIG	YES
DOPPLER_TOKEN	YES
DOPPLER_FORMAT	NO
DOPPLER_INCLUDE_DYNAMIC_SECRETS	NO
DOPPLER_DYNAMIC_SECRETS_TTL_SEC	NO
DOPPLER_SECRETS	NO
DOPPLER_INCLUDE_MANAGED_SECRETS	NO
DOPPLER_PRINT_ENV	NO
DOPPLER_INIT_EVENT	NO

Secrets Injection Hook

By Default The secrets will be injected into env by init event "cli:before" Use DOPPLER_INIT_EVENT to change event key;

Monitoring Module

Active Doppler monitoring module in Directus Admin Settings Page. Monitoring page shows current project, config, token values.
